Attachment Number 26

Inspector General's Recommendation Number 26, Page 131

Recommended DCI Action: Approve

Inspector General's Statement

Recommended that:

25X1A6a

The Chief of Station, [REDACTED] re-establish the functions of the Reports and Requirements Branch (and of the PCI Branch to the extent that it has requirements and reports functions) at a higher level to bring into play its full capability to improve station reporting.

DD/P Comment

Concur.

We are in general agreement with the recommendation and it has been forwarded to COS, [REDACTED] for comment. It must be borne in mind that a Chief of Station requires considerable latitude in the local assignment of his personnel. The Division has always recognized the value of top level requirements and reports officers, but also recognizes the local conditions and limitation on personnel. [REDACTED]
